

At the end of the day success is simply measured by how well you wow customers and blowout earnings. But with so many moving parts to strategy and execution, how do you know what's working and what's not? You know that the details can either bring your company to its knees or unleash its real potential. RizePoint understands that without improvement you cannot be competitive in markets of fast-changing customer preferences and regulatory requirements. We can help, and we want to be part of your journey to greatness.

ACTIONABLE INSIGHT

RizePoint Business Intelligence and Analytics is a consultative and outsourced development service to help you with advanced Business Intelligence architecture and design, data transformation and modeling, data analysis, and dashboard and reporting design and development. By using these services, you will be able to determine the right performance metrics and deliver the right information at the right time to the right people.

PERFORMANCE MEASUREMENT

Centrally measure the performance of people and critical business processes. Understand how to improve productivity, efficiency, and consistency while reducing errors regardless of your assessment or auditing approach. Track compliance of quality and safety inspections, upload mystery shopper information, track voice of customer studies, interview employees, and more. Deploy a standardized data collection model to effectively ensure the adoption of corporate standards for better reporting and business analytics.

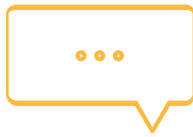

REPORTING AND DATA ANALYTICS

Review actionable insight into assessments, audits, findings and corrective actions. Easily identify performance variances and root causes, areas for change, and improvements achieved. Discover powerful data summaries, trending analysis, standards benchmarking, issue correlation, and issue forecasting. Create departmental and executive performance scorecards that will lead to better insight, planning, and execution.

ADVANCE DATA CAPTURE AND REPORTING

Close gaps in compliance and execution with improved accountability. Effectively document and manage variances. Ensure visibility and transparency at all levels of the business.

COMMUNICATION AND ADMINISTRATION

Centrally create standardized email templates. Send email to any system contact, enabling rapid, guaranteed communication with verified, directed responses. Create, manage, and revise your assessment programs as your business grows or changes in any way.
