

**M**oving from paper-based to paperless assessments is just the first step to improving the effectiveness of your mobile inspection initiatives. Sure, eliminating the hassle of filing, storing and searching for paper forms enables you to gather data better. But, augmenting your operations with the right auditing tools enables you to see issues earlier and correct those issues faster.

RizePoint empowers you to design auditing programs that efficiently collect data, easily analyze key details, quickly correct issues and generate powerful reports that keep every stakeholder in sync.

In conjunction with the RizePoint Management Console, the RizePoint Mobile Auditor® app enables your inspection teams to arrive for inspections ready-to-go. Inspectors are empowered not only to thoroughly assess sites, but to also preserve time to coach local team members through inspection issues. Plus, auditors see immediate results from their assessment because long, manual processes to communicate results are eliminated.

Only RizePoint provides the tools, technology, and expertise to proactively safeguard enterprise compliance – for both internally-imposed standards and externally-imposed regulations.

## EFFICIENTLY GATHER BETTER DATA

Ensure all aspects of inspections are covered by creating effective, customized question and answer audit forms in the RizePoint Management Console, then push them out to your inspection teams. Auditors are guided through assessments using intuitive step-by-step navigation.

- Capture data easily using powerful form navigation that leads auditors through the process.
- Pause, or restart, an audit at any time.
- Grant permissions for inspectors to add extra information on the fly or modify submitted reports.
- Push down custom forms to an auditor that are specific to a location.

## RIZEPOINT MOBILE AUDITOR AT-A-GLANCE

- Mobile app available from the Apple® App Store, Android Market™, and Microsoft Windows® App Store
- Web-browser access also offered (no local data store)
- Gathers site audit data with ease
- Uploads inspection data to the RizePoint Management Console

## WORKS SEAMLESSLY WITH RIZEPOINT MANAGEMENT CONSOLE

Mobile Auditor syncs with the cloud-based RizePoint Management Console to manage:

- Audit form creation
- Corrective action
- Reporting
- Automated communications

*“This year our internal Operations Directors began conducting internal audits using RizePoint, and they commented on how much easier and more enjoyable auditing was because they could eliminate the paper and pencil routine and allow RizePoint to notify the right people automatically.”*

**Lionel Bisson,**

Director of Quality Assurance for  
Friendly’s Ice Cream LLC

## HIGHLIGHT IMPORTANT DETAILS

Efficient site inspections are taken to the next level when auditors have the ability to call-out important information. Mobile Auditor makes it easy for inspectors to draw attention to critical details:

- Take pictures and save them to a report.
- Upload short videos.
- Attach files.
- Mark-up images.
- Format text.

## PERFORM EVALUATIONS WHEREVER, WHENEVER

RizePoint Mobile Auditor brings the assessment forms created in the RizePoint Management Console to life. Whether accessed via a web-browser, or through the Mobile Auditor app on a smartphone or tablet, auditors arrive ready to inspect.

- Use Mobile Auditor offline to free inspectors from worrying about connections so they can go wherever they need to get the job done.
- Access Mobile Auditor via a web browser to immediately sync audit results.

## PROTECT IMPORTANT INFORMATION

Sensitive audit results must always remain secure and confidential. Strong encryption, single sign-on functionality using network logins, and individual access rights protect your data at every stage.
