

RizePoint Business Intelligence

It's one thing to collect audit data efficiently using modern methods such as apps and mobile devices. But, when you use RizePoint, your audit information is quickly available for reporting and analysis. Now you're ready to review your organization's strategies for standards and regulations.

SEARCH-DRIVEN ANALYTICS—COMING IN 2017

Analyze Data Using Search Engine

When reporting needs go beyond standard dashboards, create ad-hoc reporting with Search-Driven Analytics. Use the power of a search engine to analyze RizePoint data and get immediate results as you type. Ask questions, analyze data, and build pinboards — in seconds.

MANAGEMENT DASHBOARDS

RizePoint management dashboards put the facts and figures you need most at your fingertips visually highlighting important information. View top-level details and drill down to specific data using any of the available standard dashboard options.

Audit Approval

Displays the audit result approval details, including duration and status for each step involved in the process.

(requires latest Audit Approval feature release)

Auditor

Displays information and trend analysis about audit companies and auditors conducting the audits, such as number of audits, average scores, audit duration times, and ratings.

CAM Plan and Approval

Displays a comprehensive view for CAM plans, tasks, and the approval process that includes plans due, coming due, overdue, complete vs. incomplete, and critical vs. noncritical based on various aspects like location, forms, types, and more.

(requires Corrective Action Management feature)

Location

After selecting a location, displays a comparative view of overall scores for the location vs. the management hierarchy levels, as well as information related to repeat violations, and audit category vs. report category scoring.

Non-Compliance

Displays information about non-compliant responses including counts and percentages, findings, and details by different views such as audit form, audit type, report or audit category.

Ratings

Displays information about audit rating trends and detail information viewed by audit type, audit form, report category, and audit category.

Scoring

Displays overall percentage score trends and distribution for management hierarchy and location levels. Also provides ratings as determined by the audit form scoring.

Scoring for Report Category

Displays the overall percentage scores for report categories and sub-categories at the management hierarchy and location levels.
