rizepoint

The world's most powerful **inspection solution** for health departments

Backlogs. Errors. Unrealistic oversight expectations. These are the common challenges that must be overcome in order to prevent the spread of foodborne illnesses in your community and prepare to address future regulatory requirements.

The RizePoint Mobile Auditor® app and the cloud-based RizePoint Management Console team up to give health departments an efficient solution to quickly inspect multiple locations and rapidly report findings.

With this efficiency tool in your department's corner, you'll not only reduce backlogs by doing away with time-consuming activities, you'll also eliminate common errors and frustrating practices related to pen and paper solutions. Plus, you'll gain better insights using the data you collect, with little effort on your part.

Mobile Auditor®

Mobile app for remote site inspections

Mobile Auditor enables efficient and thorough assessment of remote locations through feature-rich online or offline capability.

Business Intelligence

Turn audit results into a reporting powerhouse

Quickly sync audit information to provide dynamic visual reporting and dashboards for key analysis using base management dashboards or search-driven analytics (coming in 2017).

Management Console Interface

Easily display information users need most

Dynamic user interface with quick, at-a-glance visibility into recent audit results, administrative messages, internal news, and RSS feeds.

Audit Form Creation

Ensure all aspects of inspections are covered with effective, customized forms

Use the RizePoint Management Console to build customized forms that can easily be maintained and pushed out to the Mobile Auditor app.
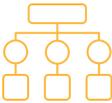

Security

Protect audit results

Encryption, single sign-on functionality using network logins, and individual access rights protect your data at every stage.

Audit Scheduling

Schedule audits with ease

Create and view audit schedules with ease in the cloud-based RizePoint Management Console.

Automated Communication Tools

Provide complete visibility throughout the entire organization

Standardized templates, email alerts, push-notifications, and report communications make it easy to manage, monitor, and communicate inspection details.

Thermocouple Integration

Streamline temperature and line checks

Conduct temperature checks with thermocouple device integration in Mobile Auditor.

API Framework

Sync your data with audit results

Sync master data from your system of record with RizePoint whenever you have updates.
