

RizePoint harnesses 20 years of leadership delivering Quality Experience Management software to help the world's biggest brands navigate—and excel in—the experience economy.

**Founded**  
1997

**Corporate Headquarters**  
Salt Lake City, Utah

## Our Solution

Brand standards. Quality assurance. Safety. Managing details like these are critical to business success. But ensuring compliance and consistency can become challenging as businesses grow. The cloud-based RizePoint Management Console and the RizePoint Mobile Auditor® app team up to provide a single view into compliance data. Users gather better data, see issues earlier, and act to resolve those issues faster—before they impact customers' experiences.

### Mobile Auditor

A mobile app for remote site inspections, Mobile Auditor enables efficient and thorough assessments through feature-rich online or offline capability. Top food service, hospitality, and retail brands conduct audits on smartphones or tablets and instantly upload results for immediate feedback. With features like video and photo annotation, offline access, and step-by-step navigation, quality teams get the information they need to proactively protect global operations.

### Management Console

RizePoint Management Console allows users to build custom forms and push updates to field teams immediately. Industry-leading quality teams schedule audits, view results, and automate corrective actions using business workflows. Dashboards highlight key information from audits, and powerful search-driven analytics takes business intelligence to a whole new level.

## Leadership

**Frank Maylett**  
President and CEO
