

RizePoint Standards

Quality Program Management Software

RizePoint Standards quality program management software cuts the time it takes to manage your suppliers in half. It empowers you to establish and maintain a single source of truth for specification, standards, and compliance documentation, helping you quickly assess supplier performance. You simply upload, store, and tag your documents to quickly search and access relevant information when it counts.

When you're armed with the right information at the right time, it makes managing your suppliers across the supply chain simple. RizePoint Standards goes a step further and seamlessly integrates with RizePoint Inspect to deliver question-level checks and balances needed so you can evaluate and take corrective action fast and ensure any issues are resolved in a timely, documented manner. Whether you are focused on improving quality products and services or protecting your corporate social responsibility, RizePoint Standards can help. Now you can start managing by exception and apply your limited resources where they will make the biggest impact.

Centralized Document Management

RizePoint Standards enables you to establish a single source of truth for policy and standards content. The solution empowers you to bulk upload a variety of document types — including jpeg, png, ppt, xls, txt, doc, and more — via an interface or cloud storage integration. You can store, mark up, and tag specifications and standards for quick searchability, making documentation more accessible and sharable than ever before. With digital document control, you can increase efficiency to save time and money.

Comprehensive Program Management

RizePoint Standards delivers all the tools needed to define, gather, and act on quality initiatives with your supply chain. The solution documents and certifies ongoing supplier compliance to ensure adherence to standards and drive supplier performance. You can easily moderate these activities through automated alerts for disruptive events such as certification expirations.

RizePoint Standards also helps you create quality campaigns that assign tasks to suppliers. The solution tracks responses, iterations, and correspondence to keep suppliers in compliance with new standards or adjustments made to existing standards.

Streamlined Supplier Onboarding

RizePoint Standards helps you efficiently manage the work of onboarding and approving suppliers through assigned tasks and activities. Now you can establish automated workflows to share and gather business details such as certifications, proof of insurance, and codes of conduct for new incoming suppliers. You can easily push intelligent notifications to suppliers that make submitting data frictionless.

Intelligent Analytics

RizePoint Inspect provides one hundred percent transparency and visibility into all of your compliance programs. With configurable dashboards and reports, you can detect areas for improvement and provide visual reporting for location, region, or total business performance. Detailed insights then help you focus your limited resources on managing specific risk levels. Now you can easily identify noncompliance to correct issues quickly.
