

# Food Safety & Quality Management Software

## Reduce Risk & Ensure Compliance with RizePoint

Best food safety practices are key to your success, but ever-changing regulatory standards make managing compliance, quality, and safety more complex than ever before. Additionally, any food safety misstep can adversely impact your customers, your brand, and your bottom line. RizePoint is a flexible quality management software (QMS) that helps you simplify and streamline collecting and analyzing data around quality assurance and supplier quality management, so you save time and do more to mitigate risk. It's a reliable solution helps you gain visibility, spot trends, and improve results.

### Key Benefits

#### Save Time

Gather and analyze data quickly to create a single source of truth for all quality-related info.

#### Gain Visibility

Monitor incoming data automatically for up-to-date visibility through a sophisticated rules engine.

#### Drive Improvement

Close feedback loops with fast alerts and easy signoffs to quickly correct nonconformance.

#### Empower Admins

Establish benchmarks, quickly identify issues, and proactively improve results.

“RizePoint reduced cost and saved us time in gathering data. We were able to allocate that into different resources and grow in other areas.”

Tyler Williams  
VP of Operations

Quality Assurance

Compliance Management

FSMA Compliance

Supplier Quality Management

## Key Features

### Purpose-Built for Food Safety

#### Easy Data Collection

The feature-rich Mobile Auditor app works online or off for efficient, time-saving audits, inspections, and assessments. It integrates seamlessly with the RizePoint platform for timely access to all quality-related data.

#### Supplier Quality Management

Track more of your supply chain to help promote best-practices from suppliers. Easily gather supplier details and request document uploads to onboard, approve, and maintain suppliers, locations, and materials.

#### Centralized Data Source

Compile global information in a centralized location, including document control functionality and integration of all quality-related data. Creating a single source of truth helps teams align and achieve quality-related goals.

#### Always Be Audit Ready

Leverage exceptions-only management so you can spend more time managing areas that need it most. Dynamic dashboards help you quickly spot and address nonconformance so you'll always be audit ready.

#### Flexible Reports & Dashboards

Link food safety data throughout your process through built-in analytics and business intelligence tools. Configure reporting functions specifically to your business needs to find meaningful insights that help you mitigate risk and drive improvement.

#### Quickly Spot Nonconformance

Take advantage of your data before it "expires" with rules that link adverse events to automated corrective action triggers. Establish due dates, create alerts, send notifications, and easily monitor task completion to decrease risk.

## Industry Expertise and Ongoing Value with RizePoint

For over 20 years, RizePoint has been helping top brands worldwide manage their quality assurance, compliance, and supplier quality management. With a strong focus on customers, we actively seek out opportunities to improve your experience, and we're dedicated to consistent product improvements to ensure continued value.
