

## SaaS Solutions

# THIRD-PARTY AUDITORS & CERTIFICATION BODIES

## Automate Complex Auditing Processes

The auditing and certification processes are complex and time consuming. You may even be spending up to 50 percent of your day manually managing the many processes, including answering the same client question over and over: “Where am I in the certification process?” The RizePoint SaaS solution is purpose-built to help you automate your auditing and certification processes, give clients more visibility, and increase profit margins.

## Benefits

### Simplify Audit & Certification Processes

Audit, report, and analyze in one platform for faster, more accurate results.

### Centralize All Data

Aggregate all data from all sources in one place to reduce double entries and human error.

### Give Clients Visibility

Create instances for each client, giving them instant insights to their certification status.

### Increase Profit Margins

Take advantage of the RizePoint Partner Program to become “stickier” with clients.

# Key Features

## Audit, Report & Analyze with RizePoint

### Mobile Auditor (MA)

Leverage a user-friendly application to conduct audits online or offline for efficient, time-saving audits. Generate feedback reports on-site, so clients can see preliminary results immediately.

### Corrective Action Management (CAM)

Make CAPA easier by setting in-software rules that trigger alerts with clear action items so clients can correct noncompliances. Establish due dates, send notifications, and easily monitor task completion to decrease risk.

### Private Client Instances

Create secure white-labeled instances for each client so they can easily see their status in the certification process, outstanding corrective actions, and other customized insights.

### Open APIs

Connect any data source so you can easily gather, store, and organize critical data into a single source of truth. You'll quickly see client insights and provide faster solutions.

### Comprehensive Reporting

Configure and request new requirements with simple surveys and forms, or add auditing capabilities to ensure compliance against brand, product, and government standards.

### Configurable Forms

Create your own audit form for each audit type and certification. Connect rule excerpts, examples, and images to ensure that both auditors and clients understand each audit item.

*RizePoint has given us the ability to manage and review audits like never before...It has made it easier for us to put our focus in the right areas.*
