Corrective Action Management

Automating Corrective Action for Better Risk Mitigation
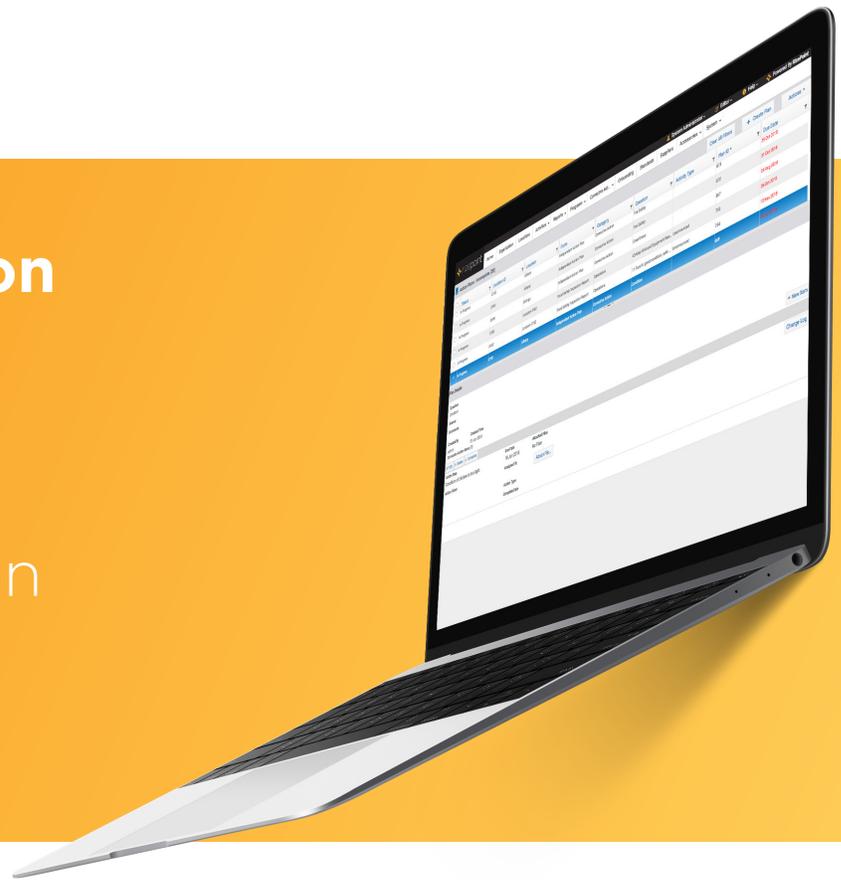

Fast corrective action is key to the health of your quality programs and brand protection. The longer it takes to fix an issue, the more likely it is that the issue will grow into a bigger problem. Additionally, corrective action data can "expire" quickly, meaning you may be using time and energy fixing only part of the problem or even the wrong problem if you don't act immediately.

RizePoint's Corrective Action Management feature helps you act fast when an audit question fails or nonconformities are otherwise detected. You'll start by setting triggers that will automatically notify stakeholders and send workflows to the right workers when an issue arises. From there, it's easy to set timelines and track progress until all tasks are complete. It's a time-saving tool within a comprehensive quality management software that will quickly become key to your corrective action-preventive action (CAPA) efforts.

"[RizePoint] has helped us improve operations, and based on my experience, I know it would be an essential tool for other organizations too."

Chris Belmont | Director of Operations

Features

Alert Automation
Set triggers and assign timelines for audit questions or critical control points to immediately notify stakeholders and workers to begin corrective action.

Overview Dashboards
Track all corrective action activities in one place to ensure issues are completely resolved in a timely manner.

Stakeholder Sign-offs
Keep clear, corrective action records with manager or stakeholder approval functionalities built right into the software.

Benefits

Create Custom Workflows
Tailor each workflow to ensure all steps for corrective action are both right for your business and are clear for workers and stakeholders alike.

Spot Trends
Store and analyze historical corrective action data so you can spot trends as a key component of your preventive action efforts.

Save Time
Use automation to save time so you can spend more effort refining your entire CAPA program and driving improvement.
