Stand Out from the Consulting Competition

As a consultant, you live and breathe data in order to help your clients find meaningful insights and improve their business with your products or services. You need to facilitate audits and assessments to help companies get and stay certified, but you also need to analyze data and produce reports that show your clients how they compare to industry standards and how they can drive improvement and grow as a business.

RizePoint offers quality management software (QMS) that can set you apart from your compliance consulting competition. Audits, surveys, assessments, and inspections are all a breeze with RizePoint, but that functionality is only the beginning. Our platform also includes robust business intelligence tools so you can create in-depth, visual reporting that helps you spot trends and improve results. You'll tell data-driven stories, generate visibility, and create CAPA plans that will help you and your clients gain a competitive edge.

Diversey

> "The ask-answer functionality in RizePoint is so easy to use while providing useful insights. For example, I was able to find specific answers for a client in just a few seconds during a phone call. I was blown away, and even better, my client was thrilled."
>
> **Marc Loman | Global Director of IOC Customer Operations**

Features

Search-Driven Analytics

SDA indexes each client's data, understands how it's related, and generates reports to help you gain visibility and drive improvement. The simple ask-answer functionality returns insights in seconds.

Corrective Action Management

CAM is a game changer for corrective action plans. You can help clients set rules, establish due dates, send notifications, monitor task completion, and create triggers for automatic alerts.

Mobile Auditor

Mobile Auditor helps you collect data and sync results immediately from any location. You can also customize all audit and inspection forms to collect the most meaningful data for each client.

Benefits

Intelligent Insights

All your clients have unique business needs, which is why RizePoint's customizable reports, dashboards, and pinboards enable you to easily deliver client-specific insights.

Comprehensive Data Integration

Creating an information hub will help your clients be consistent, compliant, and proactive. APIs help you gather and report on all data to create a single source of truth.

Easy Certification Audits

Getting and staying certified is important for each of your clients no matter their industry. RizePoint's Mobile Auditor, configurable forms, and automated alerts make certification tasks frictionless.
